

Real Results For the complete horse

Stress is a common denominator to many health problems in horses especially performance horses. Their lifestyle, work habits, diet, genetics and overall mental attitude have a lot to do with how much stress impacts on their health, but the good news is that there are effective ways of managing it.

By reducing oxidative **stress** using antioxidants, clinical studies have shown in their ability to, help reduce the negative impacts of stress. Through daily use, **Calm & Focus** may also help us to revitalize the whole body, enhance energy and elevate concentration and memory.

Signs of Stress in a Horse:

In horses, we often see stress manifest in cases of:
 stomach ulcers
 digestive problems
 immune compromise
 emotional vices such as bolting, pacing, pawing, weaving, cribbing, rearing, and many other performance disturbances.

In the equine industry, anxiety and stress are major players, resulting not only in health implications but also compromises training and overall performance potential

Calm & Focus has been tested negative for all controlled substances by the LCH laboratories in Paris.
