CBD

Balancing Formula Mild Natural Mint HEMP CBD Oil Tinctures 250mg 500mg & 1000mg

XpressHempCBD has created a unique Human Tincture formula using Lab-Tested CBD **Hemp Extract**, MCT Coconut oil and all-natural flavourings.

XpressHempCBD tinctures have been formulated to be used on a daily basis to improve general health and wellness naturally by supporting the Endocannabinoid system. The Endocannabinoid system (ECS) is unique in its primary function. Unlike our other biological systems, the ECS works to keep all the other systems functioning healthily. This is the main goal of the ECS: healthy homeostasis. Research is ongoing in CBD therapy, however evidence indicates that CBD is helpful in treating:

Pain Management - Anecdotal evidence suggests that CBD can be used to help manage chronic pain and suppress muscle spasms in many cases. CBD is especially beneficial due to its lack of intoxicating effects and a possible lower potential for side effects than many other pain medications.

Inflammation Conditions - Such as Fibromyalgia, Rheumatoid Arthritis, Multiple Sclerosis and autoimmune disorders have all shown positive responses to CBD therapy. The Arthritis Foundation has stated that CBD may help with other arthritis-related symptoms, such as pain, insomnia and anxiety.

Anxiety - A 2015 analysis of previous studies concluded that CBD is a promising treatment for numerous forms of anxiety, including social anxiety disorder, panic disorder, obsessive-compulsive disorder, generalized anxiety disorder, and post-traumatic stress disorder.

Sleep - CBD has the ability to reduce anxiety, which can be helpful in reducing sleep difficulties and improving sleep quality. CBD may increase overall sleep amounts, and improve insomnia, according to research. CBD has been shown to reduce insomnia in people who suffer from chronic pain.

Psoriasis - The ECS is also part of our skin. This means that Endocannabinoid receptors can be found in our skin, giving CBD extraordinary possibilities for therapeutic effects on skin problems. These conclusions are supported by studies that indicate a great potential of phytocannabinoids in the fight against skin problems such as psoriasis.

Tinctures have been used for centuries as an effective method of administering herbal remedies to humans. It is the perfect way to provide safe and effective life-long health support.

XpressHempCBD Human tinctures have been created with a proprietary formula containing: MCT (medium chain triglyceride) Coconut oil - Rich in essential fatty acids, MCT Coconut oil is also digested easily, is supportive to the gut environment and contains a host of antioxidant properties.

Natural & Artificial Flavouring - Our flavouring includes natural terpenes and artificial flavours approved by Health Canada. The flavour is pleasant mild natural mint sure to please the palate.
