Paws Claws & Hoof HEMP CBD Oil Tinctures 500mg & 1000mg

Tinctures have been used for centuries as an effective method of administering herbal remedies to animals. It is the perfect way to provide safe and effective life-long health support.

XpressHempCBD has created a unique Animal Tincture formula using Lab-Tested CBD Hemp Extract, Unrefined Hemp Seed oil and MCT Coconut oil.

CBD **Hemp Extracts** contain Cannabinoids that provide the body with a multitude of health

benefits. The Endocannabinoid System is essentially the system that processes Cannabinoids introduced into the body. Just like humans, horses, dogs and cats also have an Endocannabinoid System that functions much in the same way as the human ECS. Here are just a few examples of the benefits of CBD **Hemp Extract**:

Pain - CBD has become renowned for its painkilling properties. Studies show the CBD can help manage pain in many different ways.

Anticonvulsant - Perhaps one of the best-known medicinal uses for CBD is its ability to help control seizures, tremors, tics and spasms.

Anti-inflammatory - The anti-inflammatory effects of CBD are believed to be one of the main reasons the compound is so useful in treating a wide variety of conditions.

Reduces Anxiety and Stress - Much like humans, pets can also suffer from anxiety, stress or even specific phobias and CBD has been shown to help in this area.

Promotes Homeostasis - Many pet owners choose to use CBD not only as a medicine to treat a specific illness but also as a regular supplement to promote the overall health and well being of their pet.

“Perhaps the most remarkable thing about CBD is the sheer number and variety of its therapeutic use cases” (Leafly)

Hemp Seed oil contains over 30% fat. The oil is exceptionally rich in two essential fatty acids, linoleic acid (omega-6) and alpha-linolenic acid (omega-3). They also contain gamma-linolenic acid, which has been linked to several health benefits. Hemp seed oil is also a great source of vitamin E and minerals, such as phosphorus, potassium, sodium, magnesium, sulfur, calcium, iron and zinc.

MCT (medium chain triglyceride) Coconut oil is being used extensively in the pet care industry to manage many ailments. Some vets believe that the MCT's in coconut oil aid in digestion and can help heal digestive disorders, as well as improve brain energy and mental function in older pets.
